

# MARK YOUR CALENDAR & REGISTER!

**VCU** School of Pharmacy

## Center for Compounding Practice and Research

*Presents*

### **USP <800> Compliant Handling of Hazardous Drugs**

Hazardous drugs (HDs) require safe and responsible handling for you and your team, whether medical, nursing, or pharmacy. USP <800> standards are designed to protect your team, environment and patients. Presented by speakers with demonstrated expertise in handling HDs, this program reviews current regulations and recommends best practices concerning all aspects of handling HDs. This CE will give insight into 1) developing and implementing best practices when compounding sterile and nonsterile HD, 2) understanding facility design, quality systems, process flow and risk assessment, and 3) preparing for inspection readiness.

**Registration:** <http://vcuccpr.learningexpressce.com/>
